

Acryl Housing

Description

Fitting of Acryl filter housing is made by brass. Brass fitting reinforce the durability of pipe connection and improve the repetition of assembling.

Features

- Good chemical resistance.
- Much less fitting trouble than PP fitting
- Easy installation
- Accepts DOE filter cartridge which is excellent for submicron applications.
- Material meet FDA requirement for filtration of food, beverages, ultra pure DI water, high purity chemical.
- More economical than fluoro-polymer.

Specifications

Connection	Inlet / Outlet	1/2" PT, 3/4" PT
Materials of Construction	Housing material	Polypropylene / Acryl
	O-ring material	EPDM
Operating Conditions	Maximum operating conditions	50 psid / 3.5 bar at 77 °F / 25 °C
